Balustrading

A wide range of high quality treated softwood decking balustrading components and accessories.

Why Choose Q-Deck® Plus?

- Quality selected, slow grown softwood.
- 15 year performance warranty on all products.
- Product range FSC®/PEFC certified on request.

- Tanalith® E Extra treated with built-in water repellent.
- TDA DeckMark® accredited products.
- TDA DeckMark® Plus performance rated products.

Note: Please consult your supplier of Q-Deck® Plus products if Chain of Custody is required.

Strength Rated

Q-Deck® Plus strength rated balustrading combines various components from the existing Q-Deck® range and a new simple timber to timber connector.

- Ideal for commercial applications
- Robust design creates a great looking balustrade
- Simplicity of the connectors ensure a quick and simple installation
- Handrail height of 1100mm

The systems are supplied as a kit of parts. The Grand post material must be used to create the newel posts. Specific installation instructions are included.

Powder coated aluminium balusters available in a black finish.

Posts and Newels

SIZE AND DESCRIPTION (ALL FINISHED SIZES)	TREATMENT	
	SPECIFICATION	LENGTH
85 x 85mm Multi-purpose deck post (available strength graded)	UC4	1.8m, 2.4m, 3.0m
85 x 85mm Colonial newel post (including integral ball cap)	UC3	1.5m
85 x 85mm Stop Chamfered newel post	UC3	1.5 m
85 x 85mm Contemporary newel post	UC4	1.5 m
85 x 85mm Contemporary newel post	UC4	3.0m
85 x 85mm Contemporary column newel post	UC3	0.75m
85 x 85mm Classic newel post (including integral ball cap)	UC3	1.5m
85 x 85mm Classic long post (including ball cap)	UC4	3.0 m
90 x 90mm Grecian newel post	UC3	0.75m
117 x 117mm Grand Stop Chamfered Newel	UC3	1.5m
117 x 117mm Grand Multi-purpose Post	UC3	3.0m
27 x 120 x 120mm Square Post caps (rebated)	UC3	
44 x 170 x 170mm Grand Post caps (rebated)	UC3	
100 x 100 x 170mm Ball cap & post (incl connector)	UC3	
100 x 100 x 140mm Acorn cap & post (incl connector)	UC3	

UC3 = Treated to Use Class 3 UC4 = Treated to Use Class 4

Stockists will hold a core range of these products, but will not necessarily hold all. All are available to order.

Spindles

SIZE AND DESCRIPTION (ALL FINISHED SIZES)	TREATMENT SPECIFICATION	LENGTH

Strength Rated Balustrade System Kit

44 x 95mm Multi-purpose

33 x 120mm Multi-purpose

Flat Chamfered Spindle

System Fixing Kit

The systems are supplied as a kit of parts including the 44 x 95mm and 33 x 120mm Multi-purpose material, the new 27 x 95mm Flat Chamfered Spindle and the new timber to timber connecting kit. The Grand Post material must be used to create the newel posts for the system. These can be ordered separately. Specific installation instructions are included in the kit of parts.

SIZE AND DESCRIPTION (ALL FINISHED SIZES)	KIT COMPRISES
Horizontal Kit - 1800mm Newel Post Centres	<ul style="list-style-type: none"> • 4x timber to timber connectors • 10x 75mm, 40x 40mm & 40x 50mm Fastenmaster deck screws • 1 driver bit • 2x 1.8m lengths of 44 x 95mm Q-Deck® multi-purpose material, for baluster rails • 1x 1.8m length of 33 x 120mm Q-Deck® multi-purpose material, for top handrail • 27 x 69 x 970mm Q-Deck® Plus flat chamfered spindle (x10 for horizontal system)
Stair Kit - 1500mm Newel Post Centres	<ul style="list-style-type: none"> • 4x timber to timber connectors • 10x 75mm, 40x 40mm & 40x 50mm Fastenmaster deck screws • 1 driver bit • 2x 1.8m lengths of 44 x 95mm Q-Deck® multi-purpose material, for baluster rails • 1x 1.8m length of 33 x 120mm Q-Deck® multi-purpose material, for top handrail • 27 x 69 x 970mm Q-Deck® Plus flat chamfered spindle (x8 for stair system)

Technical Information

TREATMENT RELATED TOLERANCES FOR OUTDOOR WOOD PRODUCTS

When **Q-Deck® Plus** products are pressure pre-treated with TANALITH® E they swell beyond the finished size. This can be as much as 4% of the original size and depends on the moisture content before treatment and the direction of the grain. Therefore, products can end up slightly different sizes after treatment.

As these products dry back to their moisture content before treatment, they will shrink back to their original machined finished size. During long periods of dry summer weather the moisture content of the decking products can drop below their original moisture content before treatment. In this situation they can shrink up to as much as 2.5% of their original machined size and it is normal and acceptable to get a degree of surface checking.

In autumn/winter when the weather gets 'wetter' the moisture content of these products can rise back to similar levels before treatment and as a result the affects of surface checking often disappear as they close.

USE CLASSES

Timber used in an outside application, generally needs to be pressure pre-treated to meet pre-determined Use Classes (UC).

Use Class 3 (UC3)

External building, fencing and landscaping timbers used out of ground contact.

Use Class 4 (UC4)

External building, fencing and landscaping timbers used in ground contact.

We have treated all our outdoor wood products to a specific Use Class to match its likely end use application.

STRENGTH RATED BALUSTRADE SYSTEM

Q-Deck® Plus strength rated balustrading system has been strength tested to BS6180 1999: 'Barriers in and about buildings, by FIRA (Furniture Industry Research Association) International Ltd to meet the requirements of BS6399 (1) 1996 'Loadings for Buildings'. There are two available systems, horizontal and stair (set 35° angle) both being suitable for 'contract use level' which encompasses commercial areas where people may congregate such as restaurants and bars. The horizontal system however, has also passed a higher strength test meaning it is also suitable for 'public access' use which encompasses public areas such as national parks.

PERFORMANCE/STANDARDS SPECIFICATION

Q-Deck® Plus strength rated balustrade system are tested to the requirements set out in:

BS 6180: 1999: Barriers in and about buildings – Code of practice

BS 6399: Part 1: 1996: Loading for buildings - Code of practice for dead and imposed loads

BS 5268: Part 2: 2002: Structural use of timber – Code of practice for permissible stress design, materials and workmanship

TEST RESULTS (LATERAL LOADING & RESULTS)

HORIZONTAL - Q-Deck Plus® strength rated balustrade system (Grand post material as newels at 1800mm centres)

LOADINGS

	Public Access Level	DL x BS 5268: Part 2: 2002 Safety Factor	DL x Q-mark Safety Factor
Load per Meter	3.0kN/m	6.75kN/m	7.5kN/m
UDL Required	550kg	1237kg	1375kg

	Q-mark Safety Factor	All Balusters	PASS

These systems are also DeckMark® Plus accredited.

DeckMark® Plus is a new initiative from the Timber Decking Association to meet requests

from architects and commercial designers for formal performance guidance for the load bearing capabilities of structures like parapets i.e. balustrading.

DeckMark® Plus is an extension of the TDA's DeckMark® quality assurance scheme. Introduced in 2000, DeckMark® was designed to give reassurance to specifiers and consumers that timber deck components have been manufactured to established quality standards. DeckMark® Plus builds on this widely adopted scheme to combine a quality accredited product with a formal performance rating. For example DeckMark® Plus now enables architects and designers to specify balustrading systems that have been independently strength tested in line with BS 6399:Part 1 1996 to satisfy the combined rules of BS 6180: 1999 & BS 5268: Part 2: 2002. This process provides product performance ratings as guidance for certain end use applications.

Appendix 2

Warranty Information

Q-DECK® /Q-GRIP® TIMBER DECKING & Q-GARDEN® TIMBER COMPONENTS 15 YEAR WARRANTY

Hoppings Softwood Products Plc hereby certify that when fixed appropriately in accordance with the relevant design guidance **Q-Deck®/Q-Grip®** timber decking products and **Q-Garden®** timber products shall be deemed under warranty for 15 years from the date of supply.

CONDITIONS OF WARRANTY

The component shall have been supplied by Hoppings or by an authorised **Q-Deck®/Q-Grip®/Q-Garden®** retailer.

Proof of date and purchase of the timber and **Ensele®** end grain preservative or **Ronseal®** end grain preservative or **Hickson®** Decor End Grain Preservative must be produced to this effect.

Only **Q-Deck®** sub-frame timbers are deemed suitably fit for use with **Q-Deck®/Q-Grip®/Q-Garden®** components.

This warranty explicitly excludes the use of non **Q-Deck®** sub-frame components as Hoppings cannot control the specification or quality of such products and these components could expose correctly preservative treated timber to a greater degree of risk of fungal decay/insect attack.

Timber should always be treated in its final form. However, any timber exposed by cross-cutting, notching or boring after treatment must be liberally swabbed with two coats of Arch **Ensele®** brush-on end grain preservative or **Ronseal®** end grain preservative or **Hickson®** Decor End Grain Preservative, in accordance with the Arch Code of Practice for **Tanalith® E** pressure treated timber or the manufacturers instructions. Where possible cross-cut ends must not then be placed in the hazard zone of the design (ie. in ground contact).

The component shall have been fixed and maintained in accordance with appropriate guidance in force at the time. eg. the Timber Decking Manual published by the Timber Research and Development Association and the current **Q-Deck®/Q-Grip®/Q-Garden®** point of sale leaflet and website.

The warranties are wholesaler/manufacturer to consumer/buyer warranties.

However the initial raising of a complaint should be directed to the authorised retailer from where the goods were purchased. The complaint should be made in writing/e-mail and must include proof of purchase ie. a copy or scan of the original invoice.

EXCLUSIONS OF WARRANTY

- **Q-Deck®/Q-Grip®/Q-Garden®** products placed in fresh or salt water contact.
- **Q-Deck®/Q-Grip®/Q-Garden®** products supplied for installation outside UK mainland.
- **Q-Deck®/Q-Grip®/Q-Garden®** products removed from their original installation and re-used at a new location.
- Degrade caused by poor maintenance, such as allowing the accumulation of dirt and other organic matter to occur, or by a material change in the installation environment i.e. where a Use Class 3 component is 'in effect' being un-necessarily subjected to Use Class 4 conditions.
- Failure due to **Q-Deck®/Q-Grip®/Q-Garden®** components being used for any purpose for which they were not designed.

TRANSFERABILITY OF WARRANTY

The **Q-Deck®/Q-Grip®/Q-Garden®** 15 year warranty is fully transferable to new owners of the installed deck without notification.

UNDERTAKING

The warranty is for the cost of re-supply, by Hoppings, of a component that is proven to have failed as a result of fungal decay or insect attack, **FREE OF CHARGE**. It does not cover the costs of removal or reinstatement of such components or consequential costs or loss due to failure of the component.

The term 'fungal decay' as used in the warranty refers to wood destroying fungi that feed on and degenerate the wood cell walls. It excludes staining and mould fungi associated with the weathering of wood.

The term 'failed' refers to damage caused by fungi to such an extent that the component is **no longer fit for purpose**.

STATUTORY RIGHTS

This warranty is in addition to the purchaser's normal statutory rights.

DECKORATORS® 10 YEAR WARRANTY

The DecoRators™ aluminium powder coated baluster products come with a 10 year limited lifetime warranty against corrosion, chipping, peeling or cracking of the powder coated finish.
